

## **M.Sc. Student Prizes**

### ***Award criteria***

For the A.Y. 2015/16 the Department of Economics and Finance offers 9.000 euro in Student Prizes to students of the M.Sc. in Finance and Banking and M.Sc. in Economics.

There will be 6 prizes of 1.500 euro each one, to be awarded as follows:

- 3 prizes ("First Year Student's Prizes") will be awarded to students who take all their first year exams within the September session (September 2016);
- 3 prizes ("Graduate's Prizes") will be awarded to students who graduate in time within the Spring session (March 2016).

### ***First Year Student's Prizes***

The ranking will be based on the weighted average of all first year exams, to be taken within the September session (September 2016).

Criteria for eligibility:

1. being regularly enrolled in the first year;
2. having passed all first year exams, pass/fail examinations included (i.e.: Statistical Computing) within the September session (September 2016);
3. not having received transfer credits for exams belonging to other M.Sc. programmes.

## ***Graduate's Prizes***

The ranking will be based on the weighted average of all exams passed before the graduation session.

Eligible students are those who matriculated in A.Y. 2013/14 and graduate on time, that's to say within the Spring session (March 2016), with a final grade of 110/110 cum laude.

For both rankings the three prizes will be awarded to:

- the Economics student with the highest score;
- the Finance and Banking student with the highest score;
- the third-best student, regardless of which M.Sc. he/she is enrolled in.

In case two or more students are equally qualified for a prize, the criteria are modified as follows:

- the "First Year's Students Prize" will be assigned to the student who passed the smallest number of exams during the September session (September 2016);
- the "Graduate Prize" will be assigned to the student who graduated in the previous session.

In case of a further tie, the prize will be equally divided between the students.
