

Alberto Saracco got a Master degree and a PhD in Mathematics at Università di Pisa and Scuola Normale Superiore. He spent research periods in SNS, Lubiana, Roma Tor Vergata and Milano Bicocca, prior to obtaining a permanent position in Parma University, where he is now Associate Professor of Geometry.

Other than his research in geometry he is interested in teaching and communication of mathematics and the interaction between mathematics and social sciences.

He's active on social networks (YouTube Alberto Saracco, Instagram @unmatematicoprestatoalladisney)

He has written over 30 scientific papers, two scientific books and some pop math books, the last one being the second edition of "Le geometrie oltre Euclide".
