

Federica Demaria. Researcher in economics at Council for Agricultural Research and Economics (CREA) - Research Center for Agricultural Policies and bioeconomy (CREA-PB), Rome, Italy. She obtained her Ph.D. in Applied Economics from the Department of Economic, Statistical, and Financial Sciences “Giovanni Anania” at the University of Calabria in 2009. Additionally, she is a Research Associate at UMR MOISA, INRA, University of Montpellier, CIRAD, and CIHEAM-IAMM in Montpellier, France. Her research focuses on the impact of tariff and non-tariff measures, such as health, phytosanitary, and technical regulations, on trade. She also examines international trade in the agri-food sector, preferential trade agreements, European trade policies, and EU agricultural and environmental policies. Furthermore, her work explores consumers' and producers' attitudes toward genetically modified foods and involves the application of various statistical and econometric methods for analysing time series and cross-sectional data at the farm level.

Paola Fiore. Since 2016, Director of the Institutional Affairs and International Relations Office at the Council of Agricultural Research and Economics (CREA), responsible for following the Institution's international relations at bilateral and multilateral level, providing support to national institutions (Ministry of Agriculture, Foreign Affairs, etc.), with responsibility also for the enhancement of the historical-cultural heritage of CREA and the acquisition of subscriptions to international scientific editorial resources for researchers. With a background in international law, throughout her professional career she has held positions in various fields (justice and home affairs, agriculture) and contexts (European Union, Eurojust, UN, FAO, etc.), covering expert and representative roles in committees, working groups, etc. on behalf of Italian and European Institutions.
