

Research Methods: Academic Presenting

Guidelines

Below, you will find a list of potential papers to consider for the academic presentation that will take place in Week 4. Once you have chosen the paper, please let me know. You are welcome to pick a paper outside this list. However, if you decide to do so, please get in touch with me beforehand to get approval.

Master students: You should target your talk to last between 20-30 minutes. You should structure your talk to cover the main aspects of the paper, as we discussed during the first two week of the course. You should prepare the talk as if you were presenting the paper to an academic audience. The slides should be clear and well-structured. You are free to build your own exhibits - e.g., modified versions of the paper's tables and figures, additional charts to present the results or other aspects of the analysis, etc.

PhD students: In addition to cover the main aspects of the paper, you must also prepare a critical evaluation of the paper. You should tackle this as if you were writing a Referee Report for the paper. Do you see any issue with the identification strategy? Are the assumptions valid and clearly discussed? Is there anything you think the authors should have done differently? Is the interpretation of the results warranted, given the findings presented? etc. You are free to discuss this at the end of your talk (with or without additional slides) or throughout the talk.

Presentations will take place in week 4, May 6-7. We will have 3 presentations on May 6th and 3 on May 7th. PhD students will present on May 7th. The exact schedule will be confirmed in Week 3.

List of papers

Angrist Joshua, Erich Battistin and Daniela Vuri. 2017. In a Small Moment: Class Size and Moral Hazard in the Italian Mezzogiorno. *American Economic Journal: Applied Economics*, vol. 9, no. 4, pp. 216–49.
