The word AGILE was used for the first time in 2001 with the publication of the Manifesto for AGILE Software Development

The word SCRUM is already used in a 1986 article *'The New Product Development Game'* by Harvard Business Review

NTT DATA

It is precisely on this occasion that reference is made to the rules of the RUGBY game in which the players move in the fray - SCRUM - in a self-organized way ... We are in 1986, 34 years have passed since then.

SCRUM will become a method - the most widespread - which will be published in 1995 by Schwaber and Sutherland. It is used for team work for software development

NTT DATA

SCRUM & AGILE are not the same thing

Scrum is one of the many AGILE methods ...

La più diffusa

AGILE is «another thing»

it is a MINDSET, a "way of thinking", an "organizational paradigm" and - only consequently - a set of methodologies

NTT DATA
Trusted Global Innovator

Under the AGILE hat

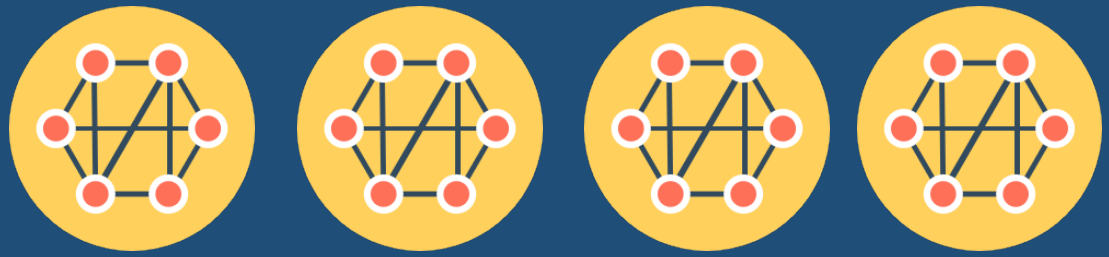
There are +40 methodologies

(some of which precede SCRUM and AGILE MANIFESTO)

NTT DATA
Trusted Global Innovator

AGILE is implemented in an AGILE way

or? By adapting the methodologies to their context



THE IMPORTANT THING IS ...
ALWAYS START FROM THE MINDSET AND NEVER FROM METHODOLOGIES
