'0332885'	30	30 e lode
'0323904'	28,7	27

Dear students,

For those who are enrolled in 2022-23 you can read in the first column the average evaluation of your assignments, in the second column the final result for Microeconomics II computed using weights of 40% and 60%, respectively. For former students, the evaluation is based on the final written exam (100%).

If a student fails the exam, her final evaluation cannot be positive.

The grade in the last column will be registered on Delphi. Any decision concerning this final evaluation (accept/reject) has to be made through the Delphi system.
