

# Gas Taxes in Europe

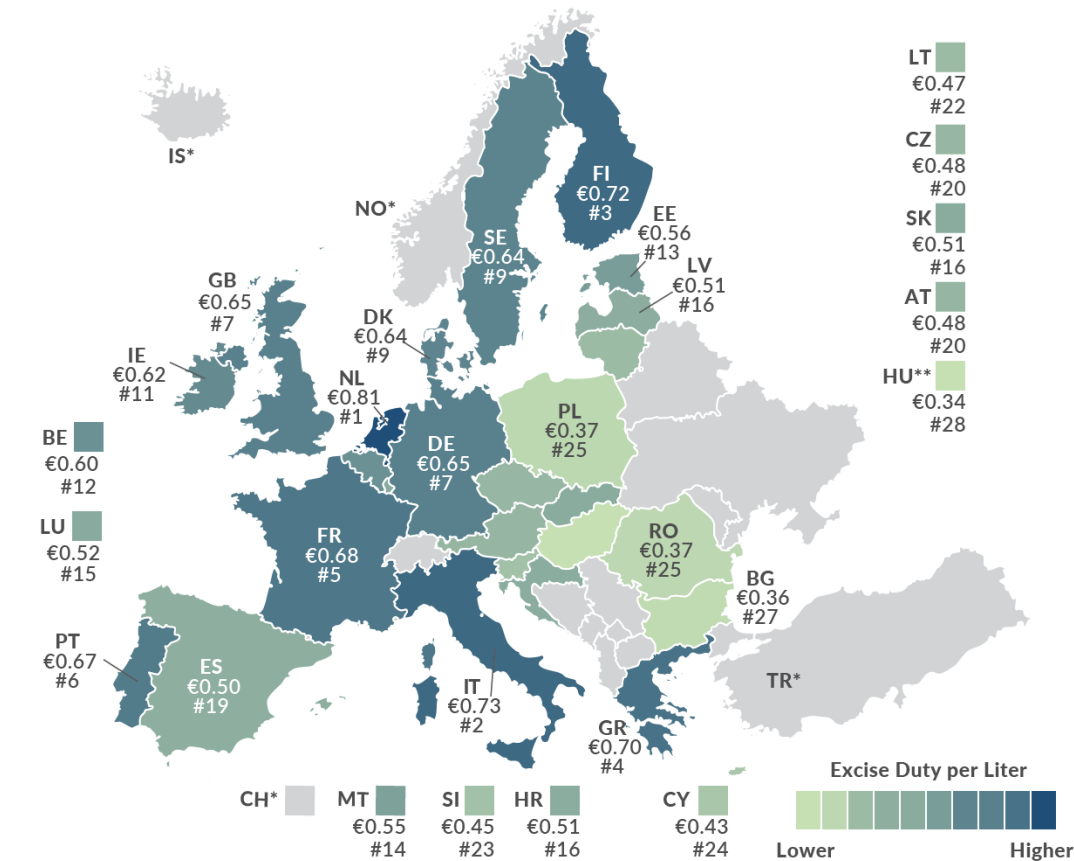

August 12, 2021

Thomas Locher

To facilitate and foster cross-border trade and to prevent significant competitive distortions, the European Union requires EU countries to levy a minimum excise duty of €0.36 per liter (US \$1.55 per gallon) on gas. As today’s map shows, only Bulgaria and Hungary stick to the minimum rate, while all other EU countries opt to levy higher excise duties on gas.

## Gas Taxes in Europe

Excise Duty per Liter (0.26 Gallons) of Unleaded Petroleum in European Union (EU) Member States and the United Kingdom, as of July 2021

Note: The excise duties apply to petroleum with a sulphur content of < 10 mg/kg, RON 95, bioethanol content, and, if applicable, include carbon taxes and surcharges.  
\*These countries are not part of the European Union (EU).  
\*\*Hungary's excise duty increases to EUR 0.36 if the world market price of crude oil is at or below 50 USD/barrel.

The lowest gas tax is in Hungary, at €0.34 per liter (\$1.49 per gallon), as the Hungarian rate is set in its domestic currency, the Forint, resulting in a rate slightly below the EU minimum after exchange rate fluctuations. The next lowest are Bulgaria (€0.36 per liter or \$1.57 per gallon) and Poland and Romania (both at €0.37 per liter or \$1.61 per gallon).

Around thirty percent of new passenger vehicles in the European Union are diesel vehicles. Therefore, many European consumers face excise duties on diesel instead of gas. The EU sets a slightly lower minimum excise duty of €0.33 per liter (\$1.42 per gallon) on diesel.

Twenty-five out of 27 EU countries levy a lower excise duty on diesel than on gas. Both the United Kingdom, which is no longer part of the EU, and Belgium levy the same rate on the two fuel types, while Slovenia taxes diesel at a rate of €0.01 (\$0.08 per gallon), higher than its rate on unleaded gasoline. The average excise duty on gas is €0.56 per liter (\$2.40 per gallon) in Europe, and €0.44 per liter (\$1.91 per gallon) on diesel.

The United Kingdom levies the highest excise duty on diesel, at €0.65 per liter (\$2.81 per gallon), followed by Italy (€0.62 per liter or \$2.66 per gallon), and Belgium (€0.60 per liter or \$2.59 per gallon).

The countries with the lowest excise duties on diesel are Hungary, at €0.32 per liter (\$1.37 per gallon), again below the minimum rate due to the exchange rate, followed by Bulgaria and Poland, which both charge duties of €0.33 per liter (\$1.43 per gallon).

All EU countries also levy a value-added tax (VAT) on gas and diesel. The excise amounts shown in the map above relate only to excise taxes and do not include the VAT, which is charged on the sales value of gas and diesel.
