Macroeconomics February 2019

You did very well, but almost everyone made one mistake.  In the graph, the maximum
of the Kdot = 0 curve is at K golden rule which is greater than K steady state of the
RCK model.  It has to be at least as large or the transervsality condition is violeted.

29+ will be rounded up to 30.

Bonelli       29
Calascibetta 26
Cesaretta     29+
Ciarletta     29
DiLello       26
Ellhallag     29
Gamboa        30 Lode
Magni         29+
Primitivo     29
Sabbi         29+
