

Admission's Process

The course in Business Administration and Economics has a restricted access, only 180 students will be selected through a multiple questions' test assessing different skills:

- General mathematics
- Logic
- Verbal Comprehension

Students are also asked to present an official certification for the English language showing a level of at least B2 of the CEFR.

Q&A

Why a test?

The aim of the test is to highlight candidates' level of aptitude and preparation that is required in order to successfully undertake economic studies.

Who can take the test?

The test is reserved to students in their last year of high school and which are receiving a diploma during the 2016/2017 A.Y and students already in possession of a diploma valid for the enrolment in the Italian universities (12 years of education).

Coordinator: Professor Luca Gnan

Three-year Programme in English

The Bachelor in Business Administration & Economics adds a strong value to anyone's curriculum. It is fully taught in English and represents a strong plus for an international career. The effective combination of academic knowledge, training seminars and a constant interaction with companies allows BA&E students to get an early exposure to the business world. Our programme has a vast international network enabling students to spend time abroad through the Erasmus+, Overseas programme, or funded thesis research.

Student services

We offer our students continuous assistance and support during their enrolment process and academic life. Students can benefit from the facilities offered by the School of Economics, such as free access to Wi-Fi, the Language Laboratory, PC Laboratories, the Library and different Cafeterias.

Accommodation

We propose different housing solutions to our students. Public transport covers all mobility needs in order to connect them with the School.

Tuition Fees

The annual tuition fee is 2.000 €. Students also have to pay an additional University tax, ranging from 488 to 1.450 € according to their income bracket.

Scholarships

The programme offers its students several funding opportunities, based on income and merit brackets

Our Partners

Our Goals

The programme provides the competencies and the conceptual and methodological tools to cope with the complexity of a global economy and the internal dynamics of organisations and institutions that elaborate their strategies in it. The programme presents a multidisciplinary approach, dealing with concepts and models from Management, Economics, Finance, and Quantitative Methods. The structure of the programme is continuously updated, focusing on the development of concrete links between theory and real-world applications. The international context supports our students to strengthen their own integration and co-competition abilities, that we strongly believe as fundamental ones to successfully take on the professional and personal life.

The Course in Brief

The programme is held entirely in English. The first two academic years share a base of common training courses:

- Fundamentals of Business Administration
- General Management
- Business Organization
- Microeconomics
- Macroeconomics
- Mathematics
- Quantitative Methods.
- Introduction to the legal system

On the third year, students can choose between two different curricula:

- Management
- Economics & Finance
