

**Classroom Experiment** – Prof. Luca Panaccione

Students who participate in the Extra Activities are expected to:

- (a) provide assistance to the organization and the realization of classroom experiments for the first-year students during the Spring semester 2017/2018;
- (b) provide assistance in managing a database which collects that data from the classroom experiments. The database will be made available to students for writing their thesis;
- (c) learn the principles of the methodology of experimental economics;
- (d) prepare a report of the activity regarding the classroom experiments;
- (e) organize a presentation based on the aforementioned report.

Regarding points (c), students are expected to attend lectures on non-parametric test for experiments in economics to be organized during the Spring semester 2017/2018.

Regarding points (d) and (e), students are expected to:

- learn to use the scientific writing program Latex;
- learn to organize a bibliographic search;
- learn to organize a short scientific report and its presentation using slides.
