Agenda

1. What is StockTrak
2. The aim of the competition
3. The structure of the competition
4. The rules of the game
5. Why to be part of it
6. Timetable and deadlines
What is StockTrak

StockTrak is an on line platform for trading simulations on stock, bond an derivatives markets.

A group of participants receive individually or as a team a virtual cash portfolio (e.g. 1,000,000€) that they can manage by trading financial securities listed on financial exchanges (e.g. Nyse, Nasdaq, London Stock Exchange, etc.) using almost real-time prices, coming from the financial markets.

The simulation is based on a set of rules that can include trading fees, portfolio constraints and other investment management criteria that make the simulation pretty close to the real world.

(For further information about StockTrak see http://www.stocktrak.com/)
The aim of the competition

The use of StockTrak in university programs represents a useful teaching tool that allow students of courses related with Finance and Investment to close the gap between theory and practices by a learning by doing process that will give the chance to…

1. Better understand the topics of the course (increasing the chance to better perform during the exam).
2. Apply and complete financial knowledge in order to develop a clear understanding about the functioning of the financial markets.
3. Experience the consequences of risk-taking in a financial portfolio’s investment strategy.
4. Develop personal skills about (1) work as a team, (2) reporting and (3) presenting.
The structure of the competition

1. The participants can choose to cooperate in a team (up to 4 members*) and/or to manage an individual portfolio.

2. The member(s) will plan for a strategy and decide what, when and how much trade in every single trading day.

3. Who will break the market rules or that will loose the whole portfolio will be dropped by the competition.

4. The team/trader that at the end of the game (13 weeks) will have the portfolio with the highest market value will be the winner of the competition.

*up to 5 for teams made by at least one student from the “Bsc” / “Triennio”
The structure of the competition

In order to learn the basics about (1) the investment products (stocks, bonds, future, etc.), (2) the market pricing process, (3) the functioning of stock exchanges…

a preliminary meetings will be scheduled before the beginning of the competition to explain the functioning of the platform and more details.
