Recruitment Day BTO

BTO conducts both basic and applied research to support organizational and business innovation through leveraging technology and digital, financial and insurance institutions, in enterprises and in public administrations and local administration.

BTO involves and supports a network of researchers from numerous Italian and international institutions with cross-sectoral research interests, relevant to the Digital area & Information Technology Management.

The activities are realized mainly in independent study and research and immediately useful to management to address the strategic, organizational and technological needs.
