

I obtained a Master Degree in European Economy and Business Law from the University of Rome Tor Vergata with a master thesis that dealt with competition policy.

Following an internship at the EU/Economic Section of the British Embassy in Rome, I was Junior Researcher at Proxenter where I worked on several projects regarding pre-commercial procurement and public private partnership. I also had a challenging experience as a Research Assistant at LEAR (Laboratorio di Economia, Antitrust e Regolamentazione) where I took part in several projects for international authorities and regulators, such as the European Commission. At LEAR, I was also involved in technical assistance projects undertaken by LEAR on behalf of the World Bank Group (WBG) and the European Bank for Reconstruction and Development (EBRD), both in developing countries (e.g. The Republic of Moldova) and in high income economies (e.g. Gulf Cooperation Council countries).

Since 2016 I have worked at PwC as a consultant for Risk and Compliance Assurance Management, where I have taken part in several engagements, both for national and international entities belonging to different industries.

My current activities mainly regard:

- Regulatory and business risk assessment
- Process mapping
- Design of regulatory procedures
- Gap analysis and remediation planning

More recently, I have been involved in activities regarding compliance in Anticorruption law (L.190/12); Anti-money laundering (D.Lgs. n. 231/07) and Health and safety at work (D.Lgs. n. 81/08).
