

“Dear current and prospect students, just few words to testimony about my two years EEBL Master of Science that represented an amazing experience for me!

I truly enjoyed all the courses I attended, the sincere motivation of my professors and the opportunity I had to hardly work with my thesis counsellor to deepen the issue of poverty trends in Europe.

Thanks to the EEBL Master I was not only given the opportunity to study in Paris for a semester, which was challenging but super funny, but I also had the chance to start working as an intern at the British Embassy in Rome .. and that was the lucky beginning of my professional carrier, which led me to work at the EU Commission in Bruxelles first, and to became then a consultant in Deloitte Digital”
