*Suggested preliminary reading: <https://www.soas.ac.uk/courseunits/15PECC005.html>

** Prerequisites

The preliminary Mathematics and Statistics course is a prerequisite to the course. Students may take Quantitative Methods I as an alternative to Statistical Research Techniques, if it is more suitable for their research interests, subject to academic approval.

***This didactic agreement foresees that students must present their thesis at Tor Vergata at the end of the second year of study. No CFU or marks are awarded for the thesis at Tor Vergata, however the presentation is necessary in order to finalize the completion of the degree requirements.

Underlined courses correspond to EEBL courses and are mandatory for credit transfer at Tor Vergata.
