

I had the chance to experience the Master of Science in European Economy and Business Law and I enjoyed it very much from the very beginning. The quality of the lectures and the approach of the professors were very high. They always encouraged us to deepen different topics with tangible examples and lots of useful and interesting researches and simulations. The structure of small and international classes really helped me to increase my competences.

During the second year I had the opportunity to do an internship in the Human Resources sector of the company where I currently work. It was a great experience that let me apply what I studied and find what I really wanted to do.

From a personal as well as professional point of view, the EEBL experience at University of Rome Tor Vergata was very enriching and for this reason I highly recommend it.
