- Degree requirement: Enrollment in MSc EEBL
- Skills required: knowledge of the Stata software (basic); some experience in management of micro-data; good knowledge of statistics.

3. Job description: “Gender and Decision-Making”

- The objective of this research project is to investigate the relationship between economic decision-making, gender and gender discrimination. It draws on diverse data sources, ranging from surveys to experiments, to deepen the understanding of well-documented gender differences in economically relevant characteristics and behaviours (e.g., bargaining, preferences for risk, health). It also explores how economic behaviour and outcomes vary depending on the gender composition in strategic settings.
- The intern will be involved in managing and statistically analysing the data that has already been collected via an online experiment. They will also contribute to the review of the relevant literature. Depending on the timing of the internship, they may also be involved in managing a new data collection.
- The intern will develop the following skills: strengthening their coding skills in Stata; producing statistical analyses aimed at (i) answering specific research hypotheses, and (ii) laying the groundwork for regression analysis; identifying reliable and robust evidence from the existing literature.

Please note: To activate an internship with the selected student, the Tutor should contact Desk Imprese Economia Tor Vergata deskimprese@economia.uniroma2.it with msc_economics@economia.uniroma2.it in copy. The student must complete 150 internship hours at least 45 days prior to his/her graduation. Upon termination of the internship, the Tutor will be required to send immediate notice to msc@eebl.uniroma2.it so the student may obtain credit recognition for the internship activity.
