DARIO DI MASI

HEAD OF FRONT OFFICE ITALY, ENEL

Integrated Trading for Enel energy business

The Enel Global Trading mission is to maximize the energy profit margins. This is achieved by mitigating commodity-related risk through the management of an integrated global portfolio. The global dimensions, our expertise and know-how allow us to develop our business in other countries where the Enel Group operates. Our approach reduces the need to execute transactions at open market conditions, while constantly monitoring risks and optimizing sales operations.
