

BUNGALOW

THE GLOBAL GOVERNANCE EXPERIENCE

OVERVIEW

PURPOSE

The purpose of the “Bungalow” project is to make sure that, within Global Governance, International students as well as Italian/European students interact actively in the academic setting and more importantly at a social setting thus, creating a dynamic, engaging, friendly and creative environment.

The project will enable students to develop their leadership and organizational skills, it will test their capabilities by fostering their creative thinking and problem-solving abilities in team-oriented activities.

In addition, the project as well as being an opportunity for students to develop and strengthen their soft skills, **most importantly, it will be a chance to learn, marvel at diversity, form relationships, have fun and discover the eternal city of Rome.**

HOW

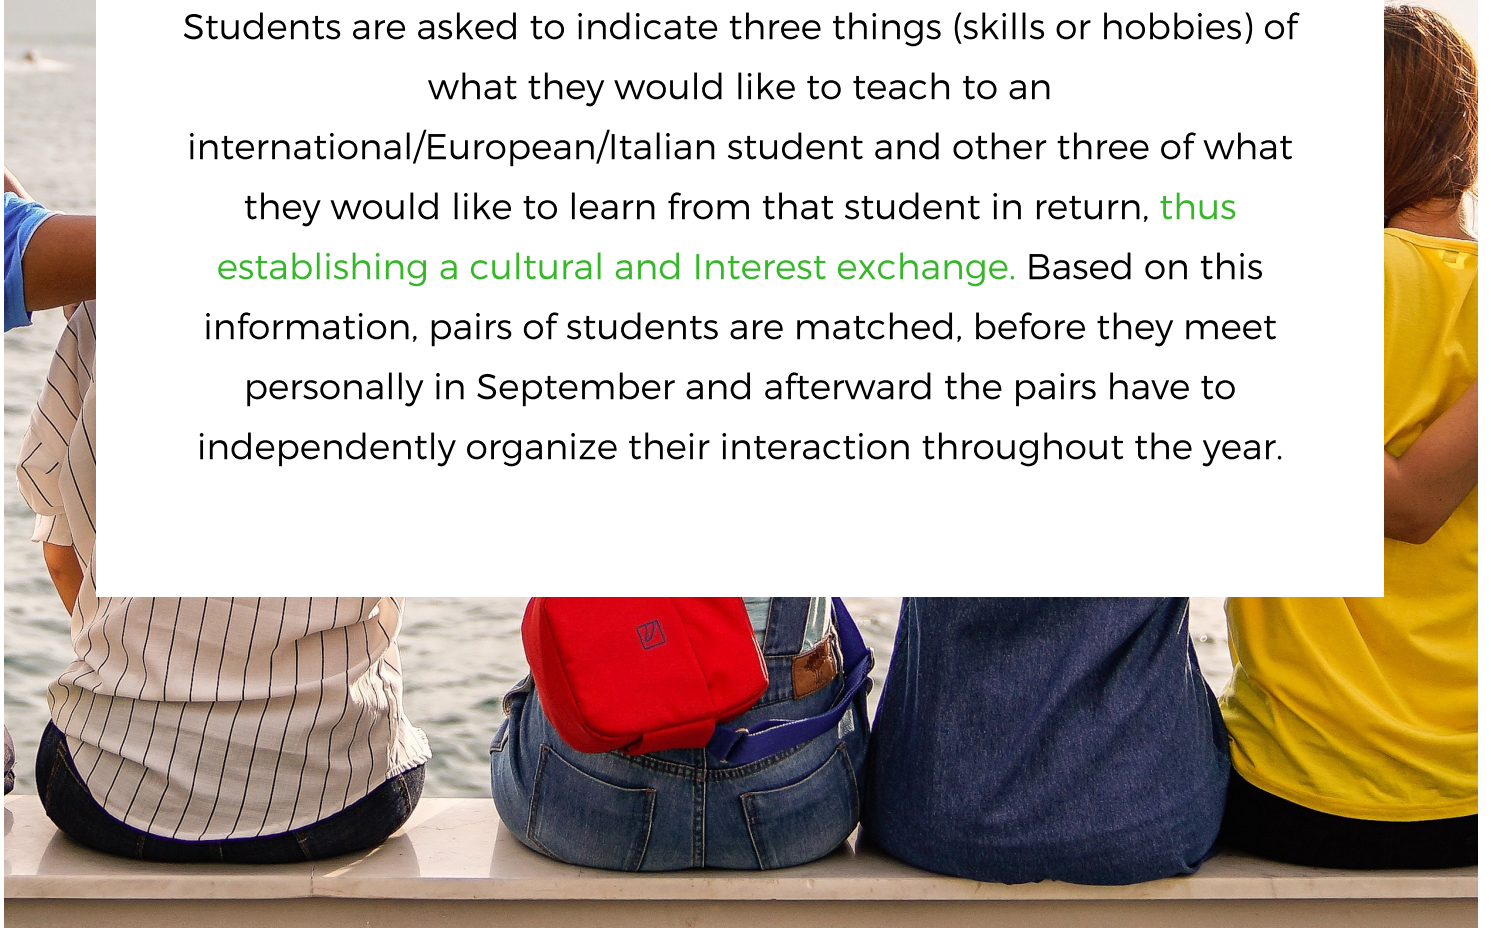

Through a decentralized mechanism in which **students themselves are the main actors, they promote independently collective and individual interest/exchange based activities and initiatives.** While having a managing body, composed of class representatives and volunteering students, that manage the project and assist the students partaking in the project.

STRUCTURE

PEER-TO-PEER EXCHANGE

Students are asked to indicate three things (skills or hobbies) of what they would like to teach to an international/European/Italian student and other three of what they would like to learn from that student in return, **thus establishing a cultural and Interest exchange**. Based on this information, pairs of students are matched, before they meet personally in September and afterward the pairs have to independently organize their interaction throughout the year.

SHARED INTEREST CLUBS

Students can choose, in order of preference, maximum three clubs to join, and be allocated to one:

Speech and Debate
Art & Culture
Sports and Recreation
Volunteering and Charity
Music and Photography
Performing Arts
Entrepreneurship club
GG Ambassadors & Media
Environment club
Fun and Social Events

Members of each club, will have to organize their club's activity, events and various initiatives autonomously, ideally twice a month. Establish a shared leadership system, by electing central roles and with the "Rotation Period" a club will have to organize joint activities with another club ex. Speech and Debate club with Performing Arts club. Moreover, members will get the chance to personalize their club with their own name, logo and social media pages. Finally, **it's all about having fun, relishing each moment together and enjoying the full Global Governance Experience!**
