

## PhD EF\_Faculty Research Showcase 2025\_January 27 and 28\_Sala del Consiglio

Each faculty member will present their research agenda to our Ph.D. students in short 20-minute sessions.

This initiative is obviously meant as an opportunity for our students to connect with the faculty members and gain a better understanding of who is working on what in our department. It is also an opportunity for faculty members to share their work and potentially find new collaborations and research partners.

*Slot*                      *Professor*                                      *Research topic*
